SGRT Operational Expansion: AlignRT Champion Group

Sutter ROC (formerly RAS)

Auburn

- Varian Truebeam w/ AlignRt, MOSAIQ, Philips Big Bore
- Cameron Park
 - Varian Truebeam w/ AlignRt, MOSAIQ, Philips Big Bore
- Roseville
 - Varian Truebeam w/ AlignRt & ExacTrac, Varian Truebeam w/ AlignRt ,MOSAIQ, Philips Big Bore
- Sacramento
 - Varian Truebeam w/ AlignRt & ExacTrac, 2 Varian Truebeam w/ AlignRt, MOSAIQ, 2 Philips Big Bore (1 HDR suite)

Expansion

- Sutter is rapidly expanding
- New sites adopting AlignRt
- Attending Sutter ROC AlignRt meetings & in-services
- Shadowing ROC clinics

Sutter Mission

Our Values

Excellence

We deliver high-quality care, have courage to take on the toughest challenges and model stewardship.

Curiosity

We are constantly learning and creating new ways to advance healthcare.

Compassion

We show empathy and understanding in every personal interaction.

Inclusion

We cultivate a sense of belonging by creating spaces for all of our people to feel valued.

Teamwork

We collaborate with humility to create a unified experience at Sutter.

Integrity

We earn trust by doing the right thing and delivering on our commitments.

Champions overview

Voluntary committee of RTTs

Encourage feedback & participation in workflow improvements

Develop best practices

Update policies and procedures

Standardization

Collaboration

Peer coaching

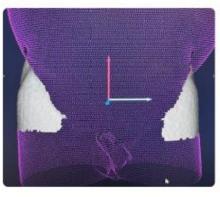

Increase user comfort and competency

AlignRt Champion Group

dign RT trainer gave us insight for ROIs on pelvis and IMRT breast patients.

elvis: This ROI allows us to keep the sheet higher on the pt for modesty. Ensure the ROI is drawn mid lateral, up to cr on the AP.

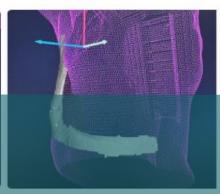

IMRT Breast: Add a small strip of ROI on contra-lateral side and ensure to draw ROI mid lateral on both sides.

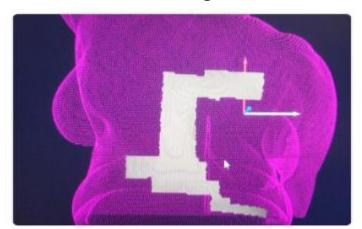

SUPPORTED THROUGH TEAMS

> The new Align RT software can now see the "grey" area on the sides of the patient that it wasn't able to read as well pr emphasized to draw ROIs more mid lateral on patients.

Participation

- Monthly committee meetings
- Forum for idea sharing (TEAMS)
- ROI competitions
- ROI ideas and questions
- SGRT community information
- In-service trainings

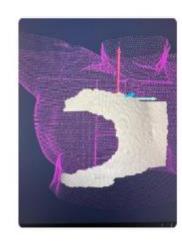

Aub case study

First image of our ROI attempt #1

Second image of our improved ROI

ROI example for pt's with Mepitel

ample of the ROI for a RT CW Mepitel patient.

THERAPISTS

Align RT Champion Group Meeting Agenda

4/28/2025 @ 1:30 pm

N	Agenda Item
0.	
1.	Sharing AlignRT wins- CP email
2.	Exactrac added to Align RT group: Invite a staff member from SAC A + RSVL 1- Jamile from RSVL 1. Need a representative from SAC A
3.	How is beam hold going for BH cases? Should Beam Hold be implemented on all <u>pts</u> ? Going to be discussed at next lead huddle
4.	SGRT 101: The Seven Stages of SGRT webinar <u>The</u> recording will be posted on Thursday, 5/1. Two-part section. Not sure how much will pertain to us.
5.	Open forum and discussion with CPMC staff- CPMC requested info per disease site of recommendations for set up and ROI placements

Align RT Open Actions

No.	Action/Discussion	Who	Status or Comment
1.	ROI Case Study Presentations	JO, LS, BB, YN, CDP	Sac to post ROI in April
2.	Standardize beam control to other machines that have capability for BH case.		Review procedure with Align Rt group + present at next lead huddle
	Align Rt training for all sites week of Sept 8 th . Task: Select which day Kristen will be scheduled at each site.		Carissa will follow up with Kristen to select which dates she will be at each site
3.	In-service presentation 1. 'send to couch' the vert while on BH or just on free breathing?- Apply pitch, roll, yaw and vert on FB. Only 'send to couch' long + lat on DIBH. (include topic at inservice)	LS, JO	In progress- JO and LS in-service presentation scheduled for May 218_11:30-12:30.

Wins

No.	Action/Discussion
1.	YN + BB +CDP to join group
2.	ROI case studies posted monthly
3.	Jagged edges on ROI's resolved

4.	Align RT for static fields SSDs
5.	Updated SBRT DIBH policy
6.	ROI contests: 2 times per year, best clinical application and creativity
7.	RSVL 2 Beam control for DIBH cases
8.	Collaborating with CPMC staff to share Align Rt workflows
9.	LS + JO in-service: Troubleshooting Align RT clinics issues
10.	JO's abstract accepted for SGRT conference
11.	CPMC + Santa Cruz invited for in-service presentation

Align RT Parking Lot

No.	Items on Hold
1.	Charging for Align RT in addition to the daily tx charge on cases w/o CBCT. On hold until after
	Quick Code is rolled out. (Rad On hold until after Quick Code is rolled out. (Rad Formation/Ray
	Station April 2025)
2.	Internal Open face mask + ROIs case study Exact trac vs. Align RT case study and Align RT w/ deaf pts for SGRT conference

Achievements to Date

Fully tattooless at all SMF ROC sites

Weekly SSDs captured with ART

SGRT capture standardization

Beam control standardization

Physicians granting autonomy to RTTs in setup decisions

Standardized workflow efficiencies

3-point data for prone set ups

ART data to all matched machines

Error prevention through data sharing

Contributed to safety culture

Dosimetry standardization of labeling

Troubleshooting manual vs auto contouring effects on ART

Exploring the potential for reducing reliance on immobilization

Holding inservices as needed

Secondary ROIs

Case studies

Postural alignment

Annual RTT competencies

Tattooless

Utilized smaller clinics for beta sites

Pelvis > Thorax > All sites

Challenges

- Prone set ups
- Electron set ups
- Decubitus set ups

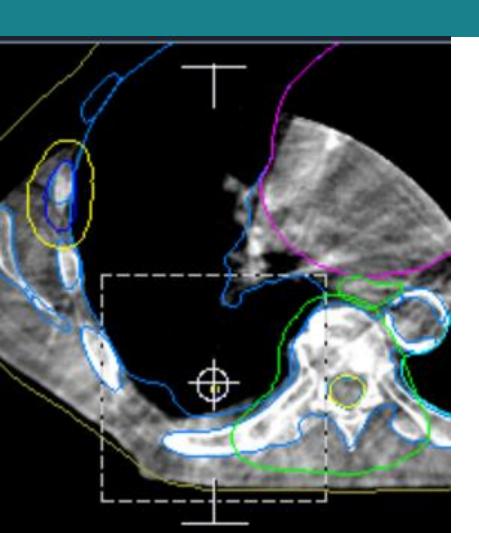

Increase indexing while decreasing immobilization

DIBH treatment of ASL patient

- Set up in room using touch for coaching
- AlignRt illumination used as coaching for breath hold during treatment
 - Illumination (Play) = breath hold
 - No illumination (Pause) = Free breathing

Dual Iso

- 2 isocenters visualized in one CBCT
- AlignRt used to setup iso 1
- CBCT & shift
- Manual shifts made to 2nd iso
- Reference capture @ 2nd iso & send to couch in lieu of CBCT

Extended SSD

- AP/PA Femur treated @ SSD110cm
- Set up ant iso w/ AlignRt utilizing postural alignment
- CBCT, shift, & capture reference
- Make vert shift in tx room for PA SSD & verify shift w/ postural alignment
- Capture reference @ PA for monitoring
- Send "0" to couch to treat (in lieu of CBCT)

Take aways

Champion Committee has accelerated adoption & use of AlignRt Peer training Increased competency Enhanced communication Collaborative decision making (among RTTs & interdepartmental) Aided in growth and expansion of Sutter sites Goal to encourage participation amongst other groups Sutter values of excellence, curiosity, teamwork and inclusion

Thank you!!
